

QUESTION PAPER ANALYSIS AIPMT MAINS 2011

PHYSICS

This Physics paper can be called as little tricky if compared with last year paper, but seemed easy or average for the CP students as 95% of total paper were from the classroom notes and CP study material.

Overall in this Physics paper 5 questions were difficult, 12 questions were average and 9 questions were easy.

CHEMISTRY

If we compare his paper with last year then it can be said that this year the level of the paper in toughness point is increased with 20% for general students and 10% for CP students.

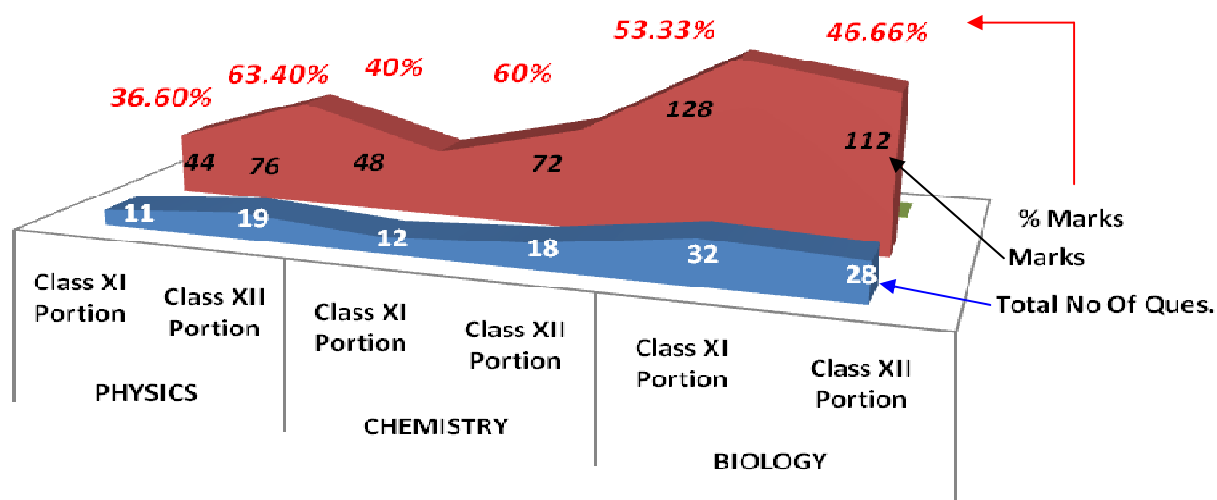

BIOLOGY

The level of this question paper was average. All the questions were from syllabus only and were taught to the students during their preparations through CP study material.

CP Students can expect a good score in biology but this paper had some questions which might have forced students to make silly mistakes, one who read the question carefully must have cracked this paper.
