

# QUESTION PAPER ANALYSIS NEET UG 2013

(5<sup>TH</sup> MAY 2013)

The First Medical Entrance Exam of this academic year – NEET UG 2013 held today at various exam centers from 10 am to 1 pm. This exam has been introduced after the scrapping of AIPMT and will be the base for admission in number of Medical Colleges across the nation. It has replaced other major entrance exams such as AFMC, BHU and some state level PMTs too.

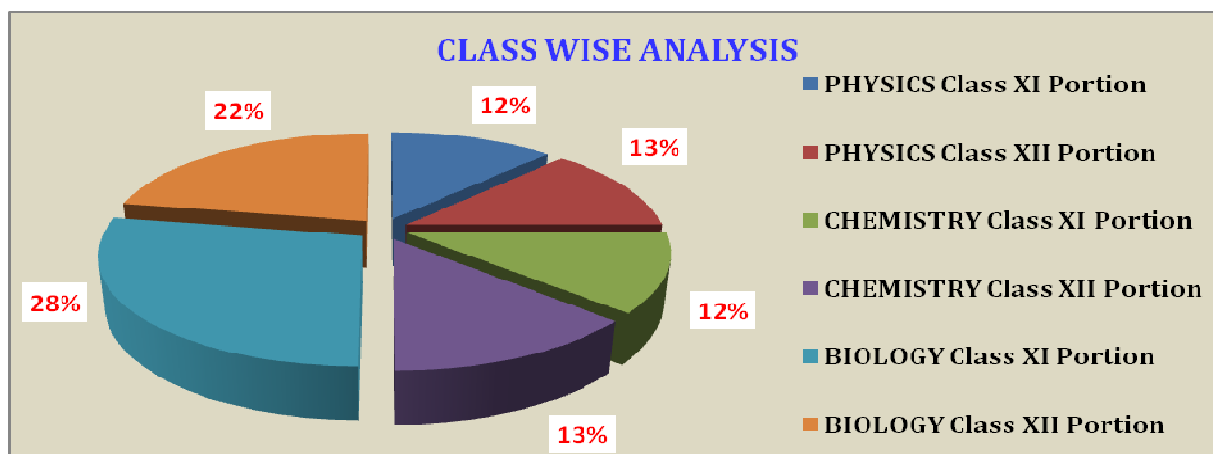

The number of questions in the paper was 180 and it was of 720 marks (each question was of 4 mark) had 1/4<sup>th</sup> negative marks for wrong answer.

**PHYSICS** paper was an average paper in which equal portion from class 11 and 12 has been asked. It was a balanced paper as theory and calculation both the parts were justified. If a student had studied his class notes, study material and exercise sheets very well he must have attempted all the questions. Overall it was an accustomed paper.

**CHEMISTRY** paper was also an average paper but few questions from physical chemistry were conceptual and calculation based. Students who had done NCERT thoroughly must have attempted Organic and Inorganic very well.

**BIOLOGY** paper was above average paper. It was conceptual paper and 55% questions were from class 11 and remaining 45% questions were from class 12. Again this year it has been clearly proven that NCERT is the paper setter book for biology in Pre-Medical exams.
